Quality Management Policy

Biowater Technology AS is an engineer, supplier, and turnkey supply of biological wastewater treatment systems. We hold a documented Quality Management System based on the requirements of:

ISO 9001:2015

Quality Management Systems – Requirements

details of which are maintained in our Digital Quality Management Manual

Biowater's Quality Assurance System (KS) builds on and systematically follows the principles of ISO 9001 standard.

Quality is a hallmark of Biowater Technology's work in all aspects and is integrated at all levels in the company's works.

Biowater Technology products and services are characterised by high competence that gives the best impression of Biowater Technology throughout the world. Through our commitment we achieve the customers ambitions for quality positively, with due considerations to the responsibility we take on through our supply and delivery activities.

Biowater Technology aims to be leading player in both Norwegian and international markets and to deliver in full accordance with customer expectations.

Biowater as a partner will add value to the quality of all projects they are involved with and provide products and services where highest standards are achieved through Quality Management.
